

## **Introduction**

# **MEDICAL OZONE TREATMENT PROTOCOLS**

Fully updated April 2016

Update dates appear at the beginning of each protocol

The protocols are guidelines that AEPRIMO made available to all its members, with the intention that they are referents in the daily professional work when ozone therapy is used with patients.

Since its foundation on July 12, 2008 the association decided, among its first tasks, to elaborate ozone treatment protocols that were put at the service of its members. The first protocols, written by Dr. Adriana Schwartz, President of the association were hung on the "Members Area" of the AEPRIMO web site in December 2008.

### **Protocols and Madrid Declaration on Ozone Therapy**

The AEPRIMO Board (face-to-face meeting, May 16, 2015, item. 17) decided to update the 2008 protocols in accordance with the "Madrid Declaration on Ozone Therapy", ISCO3, 2nd. Ed., May 10, 2015, 50 pages.

<http://aepromo.org/en/madrid-declaration-on-ozone-therapy-2nd-edition/>

The AEPRIMO President Dr. Adriana Schwartz took the responsibility to update and expand the protocols. Work already properly completed.

### **Protocols: Reference Guides**

You should always remember that is the health professional who is responsible - with their knowledge and experience - to assume how it applies the ozone therapy to his patients. Therefore, the diffusion of these protocols by AEPRIMO does not mean that the organization does so with the criterion that they must be applied by its members. Although the protocols are guidelines and benchmarks for its members AEPRIMO invites all members to base their practice on them.

### **Improving protocols**

The content of the protocols will continue to be the object of betterment based on medical experience and scientific research. Therefore AEPRIMO calls on all its members for their contributions, suggestions, experiences and knowledge to keep improving them.

ASOCIACIÓN ESPAÑOLA DE PROFESIONALES MÉDICOS EN  
OZONOTERAPIA

### **Protocols to the exclusive service of the members**

The protocols are the hallmark of the association and therefore AEPRIMO makes them available to its members.

### **Official version of the Protocols**

The protocols are written both in Spanish and English. The only official version is Spanish. Each protocol has the last update date made by AEPRIMO.

Comments, suggestions, proposals, detected errors, please communicate them to
